

AuroraTM Splashbacks

Custom coloured glass

Vibrant

Aurora Splashbacks make a bold colour statement. In a shower recess they are the easy to clean alternative to tiles.

Aurora Splashbacks

Replace tiles with custom coloured toughened glass.

- Deep lustrous colour with high gloss finish.
- Because its toughened you can use it anywhere.
- Made individually to suit your requirements.
- Exceptionally easy to clean.

Seamless

In many situations Aurora Splashbacks have no joins. That means no grout to soak up dirt and grime.

Toughened

Aurora Splashbacks are toughened to stand up to knocks and bumps.

Grooving

Something different. Aurora
V-Groove wave pattern on grey
Aurora Splashback.

Durable

Aurora Splashbacks are the sleek and contemporary alternative to ceramic tiles. The clean lines, colour options and brilliant high gloss finish will make any room shine. Be inspired by the amazing versatility of Aurora Splashbacks.

How do we do it?

Aurora Splashbacks are created by applying paint to the back surface of toughened Grade A safety glass. This creates a deep, lustrous colour with a high gloss finish that will never fade. And because we only use toughened glass, Aurora Splashbacks can be used almost anywhere in a home.

Easy to clean

Because the exposed surface of an Aurora Splashback is glass and has an overall smooth surface, they are exceptionally easy to clean. Unlike tiled surfaces with all that grout that attracts dirt and grime, seamless Aurora Splashbacks are more hygienic and will continue to sparkle forever.

Unique?

Yes they are. Every application is different so we make every Aurora Splashback individually to meet your requirements. Need to have holes for taps or power points? We can do that. Need to fit around a cupboard? We can do that too.

Every colour under the sun

Aurora Splashbacks are available in any colour. Choose a colour that makes a statement about you, or one that matches the style of your home. Select a colour from any leading paint manufacturer's colour chart. Or use our state of the art colour matching techniques to replicate any colour.
